

THE ART OF **#inverteFEST**

DECEMBER 2024

#InverteFest was conceived in 2020 by
Maureen Berg, Franz Anthony, and Saimi Hanma.

The Art of #InverteFest is made possible by the loving contributions
of human artists. No work within this book should be reproduced
without their consent.

For more info, go to [InverteFest.com](https://www.invertefest.com)

DESIGN & COVER Franz Anthony
WORDS Saimi Hanma
EMOTIONAL SUPPORT Maureen Berg

Thank you to Emmalee Jones for helping test all the hyperlinks to make
sure each artist is credited properly.

#InverteFEST

is a periodic online event where we invite everyone
to celebrate the overlooked invertebrate fauna
around them and share their joys of discovery online.

One of the ways we've found that people love to
share that joy is through artwork.

The Art of #InverteFest is our way of collecting and
archiving the work of artists from around the world
so that their artwork celebrating our invertebrate
neighbors can be memorialized and shared.

BUSY BEES MAKE HONEY

They pass nectar mouth to mouth and chew to start drying it.

BUZZY BEES MAKE MAPS

Their dances tell hivemates both direction and distance to flowers.

DIZZY BEES ARE FUNNY

They'd fall out of the air if their wings didn't make tiny tornadoes.

DOZY BEES TAKE NAPS

They were the first invertebrates that scientists observed sleeping.
